SUMMARY

Backend and applied-AI engineer who ships tools people actually use. At TCS I keep SAP's Lead-to-Cash quoting engine running and build AI systems that make the work faster; outside it I run oriz.in — a growing family of free web tools and open-source MCP servers. I want to build products at the intersection of solid backend engineering and practical AI. JEE Advanced 2020 AIR 11870 · college topper (CGPA 8.81).
